Chief, St/I/R   19 December 1955

Thru : Chief, D/S
        Chief, S/CST

Requirements :   25X1X6

        S/CST requirements for the Pirna/Sonnenstein complex are presented
below:

    1. Extent of construction activity

        a. Location of new structures
        b. Types and numbers (housing, factory buildings, test sites,
                power plant, etc.)
        c. Sizes of items being constructed
        d. Quality of finished construction
        e. Evidence of airfield construction
        f. Road construction
        g. Organization (orderliness of site, materials stockpiles,
                confusion, etc.)

    2. Information on methods and materials

        a. Labor

            (1) Bau Unions engaged on project
            (2) Number of construction workers employed
            (3) Use of women as construction workers
            (4) Conscription of local people for construction work
            (5) Housing conditions for workers
            (6) Evidence of labor unrest (difficulties in recruiting,
                    rapid turnover, etc.)

        b. Equipment and materials

            (1) Types of construction equipment and country of origin
                    (i.e. produced in GDR or in other bloc countries)
            (2) Much equipment used relative to labor
            (3) Types of materials (concrete, brick, cinder blocks, etc.)
            (4) Use of prefabricated materials (particularly concrete
                    blocks)
            (5) Use of local materials in building and road construction
            (6) Shortages of specific materials or equipment
            (7) Origin of materials (factories in GDR, USSR, or other
                    bloc countries)

Requirements ██████████████████████████ 25X1X6

3. Emphasis being placed on construction

    a. Intensity of construction activity

        (1) Length of work week
        (2) Hours worked per day, double or triple shift, etc.

    b. Time required for completion of specific structures

    c. Priorities of labor, materials, and equipment for P/S

4. Administrative Control

    a. State, ministry responsible for the project

    b. Organization or administration used as cover for project

    c. Organization directly responsible for performing construction
       work
